

ICIscientific Metal Colors

Laboratory Grade Powder Paint Finish

Color reproduction shown here may vary slightly from actual application.

Some of our more popular “two tone” selections are shown on each side. The top is the cabinet color and the bottom color represents doors and drawer faces. Note the option of wood doors/drawer faces. We offer “two tones” and “textured” at an additional cost; but, limit two colors per project.

Please request samples from your ICI Dealer.

If you select a color other than these standards, ICI will match your selection. Check with your ICI Dealer since we have hundreds of color formulas on file. Your ICI Dealer will confirm availability and advise should there be an up-charge.

* Slate gray is available without texture. All colors are available with texture.

ICI finishes its steel laboratory casework, furniture and fume hoods with a high quality powder painting process. We have the ability to paint cold, rolled steel with a smooth or a textured finish. The powder coating has excellent chemical and abrasion resistant characteristics. Our finish is certified to meet or exceed the standards of resistance and performance as presented by the Science Equipment & Furniture Association (SEFA).

Process controls are in place to ensure a quality finish is applied to our product. However, some variations within normal tolerances will occur in the gloss level and pigments; as well as within acceptable tolerances in the finishing equipment. In reviewing these colors, please allow for these variables.

Research has demonstrated that all finishes are subject to color change, depending on age and exposure to light. Please consider this and the lighting conditions in which the samples are being viewed, when comparing samples and furniture.

Detailed specifications and test results are available at www.iciscientific.com.

ICIScientific delivers the finest laboratory casework, furniture, fume hoods and custom specialty steel solutions to laboratories, universities, pharmaceutical and petro chemical companies, as well as government agencies worldwide.
