

Patriot Edge Table System

About Us

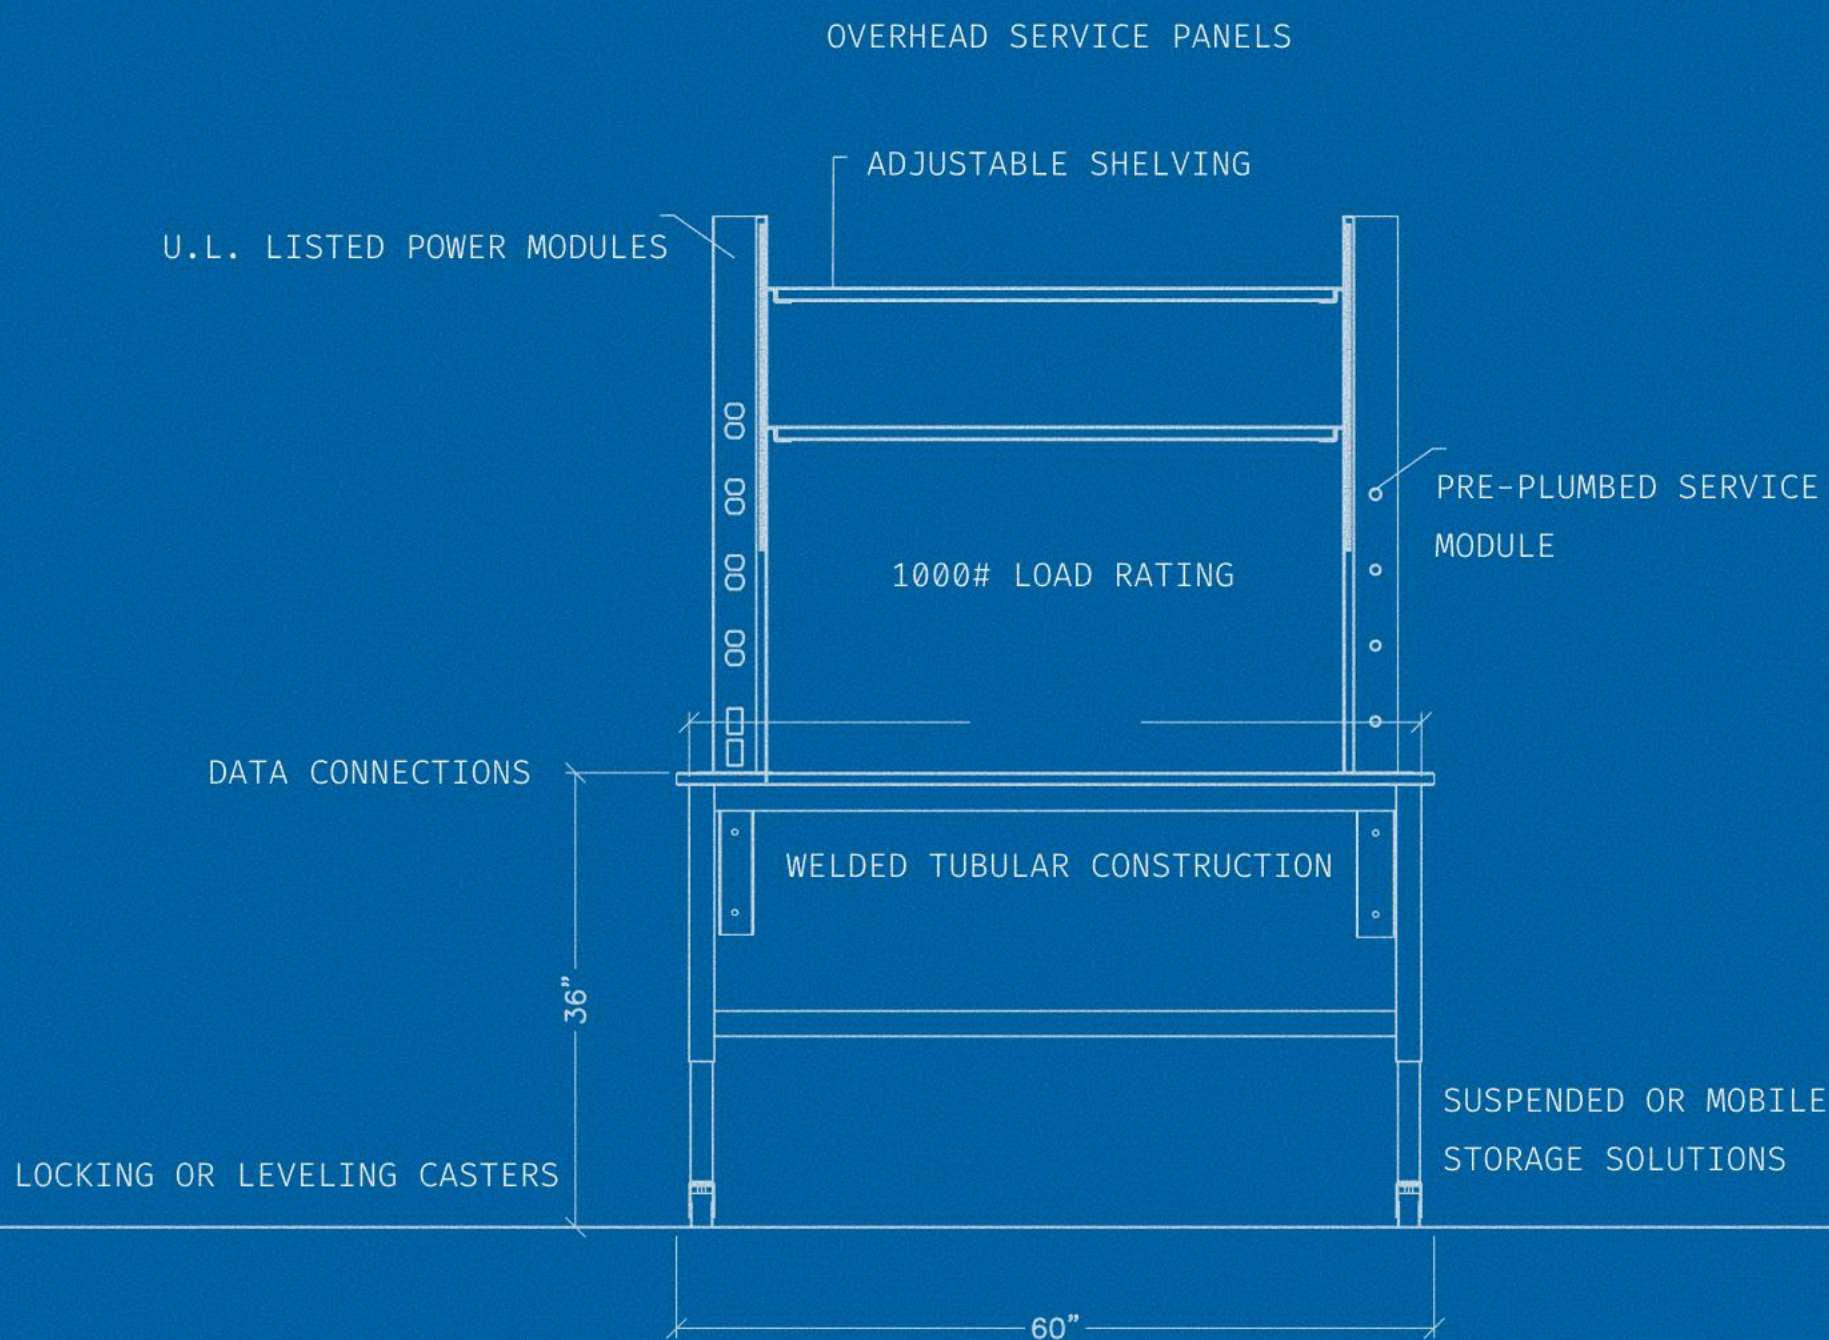

ICI Scientific is a U.S. based manufacturer of complete laboratory solutions – including customizable casework, fume hoods, and modular bench systems – proudly serving pharmaceutical, life sciences, higher education, and healthcare research facilities worldwide since 1951. From preliminary design and CAD/BIM support to installation and post-sale service, we are your single source for every stage of the laboratory project lifecycle.

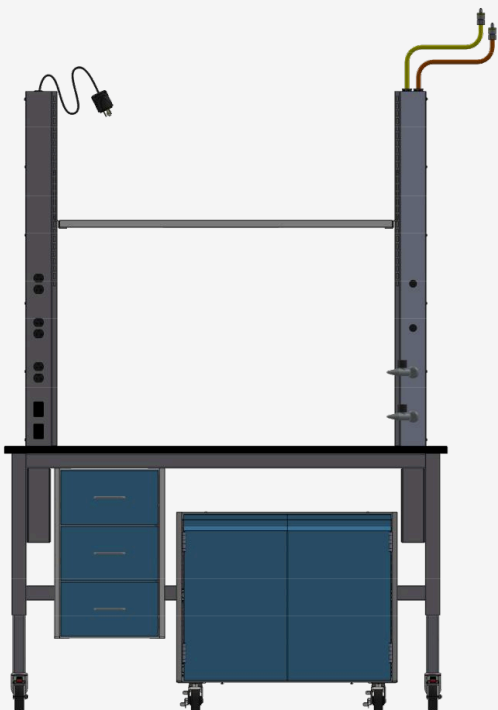

Our Commitment

Our commitment to quality, safety, and sustainability is reflected in our active membership with the Scientific Equipment and Furniture Association (SEFA), our FSC-certified wood materials, and our adherence to Underwriters Laboratory (UL) standards. As a privately owned American manufacturer, we remain focused on building lasting relationships with our clients, dealers, and partners – delivering laboratory environments built to perform today and evolve with the demands of tomorrow.

Introducing Patriot Edge

Patriot Edge, the next generation of plug-and-play table systems.

Developed in partnership with GSK and built to support a 1,000-pound load capacity, Patriot Edge brings together integral service connections, suspended or mobile storage cabinets, and UL Listed power, data, and plumbing poles to put every utility exactly where researchers need it. Its modular design – complete with height-adjustable lift systems, locking casters, and above-surface shelving – allows labs to reconfigure their environment as quickly as their science demands.

INTRODUCING PATRIOT EDGE

Patriot Edge is ICI Scientific's **premier table system** – the ultimate in flexible, powerful, and research-ready lab workstation solutions.

• Engineered for the Lab

With a **1,000-pound load capacity**, integral service connections, and phenolic or epoxy work surfaces, Patriot Edge delivers a rock-solid foundation ready for science from day one.

• The Ultimate in Flexibility

Patriot Edge brings plumbing, electrical, and data services directly to the researcher through a configurable service pole system – eliminating fixed utility constraints and empowering teams to reconfigure their space without major renovations. Optional crank or electrical hydraulic lift systems further ensure the workstation adapts to every user and every task.

• A Lasting Solution

Patriot Edge is more than a table system; it's a long-term investment in lab productivity, designed to evolve alongside your research – prioritizing service access, ergonomic flexibility, and the durability that demanding pharmaceutical and life sciences environments require.

• Built to Grow With You

Whether you're adding service poles, upgrading to an electrical lift, or docking new storage solutions, every feature is an option, not a requirement – so your lab investment grows alongside your science.

The Patriot Edge Concept

- **Redefining Lab Flexibility**

Developed in 2001 in partnership with GSK, Patriot Edge was built on a simple but powerful idea: a truly flexible lab should never have to choose between adaptability and service reliability. As the next generation of plug-and-play table systems, Patriot Edge delivers uncompromising performance – including a 1,000-pound load capacity – without sacrificing the critical service management modern labs demand.

- **Built-In Service, Built-In Flexibility**

Patriot Edge goes beyond a standard table system. With integral service connections for utility modules, and the ability to suspend or dock storage cabinets directly to the frame, the system keeps your workspace organized and fully functional as your needs evolve. Whether reconfiguring for new workflows or expanding your footprint, Patriot Edge adapts without requiring a full workstation replacement.

Patriot Edge is:

Modular – The most modular table system on the market

Powerful – Rated for 1,000-pound load capacity

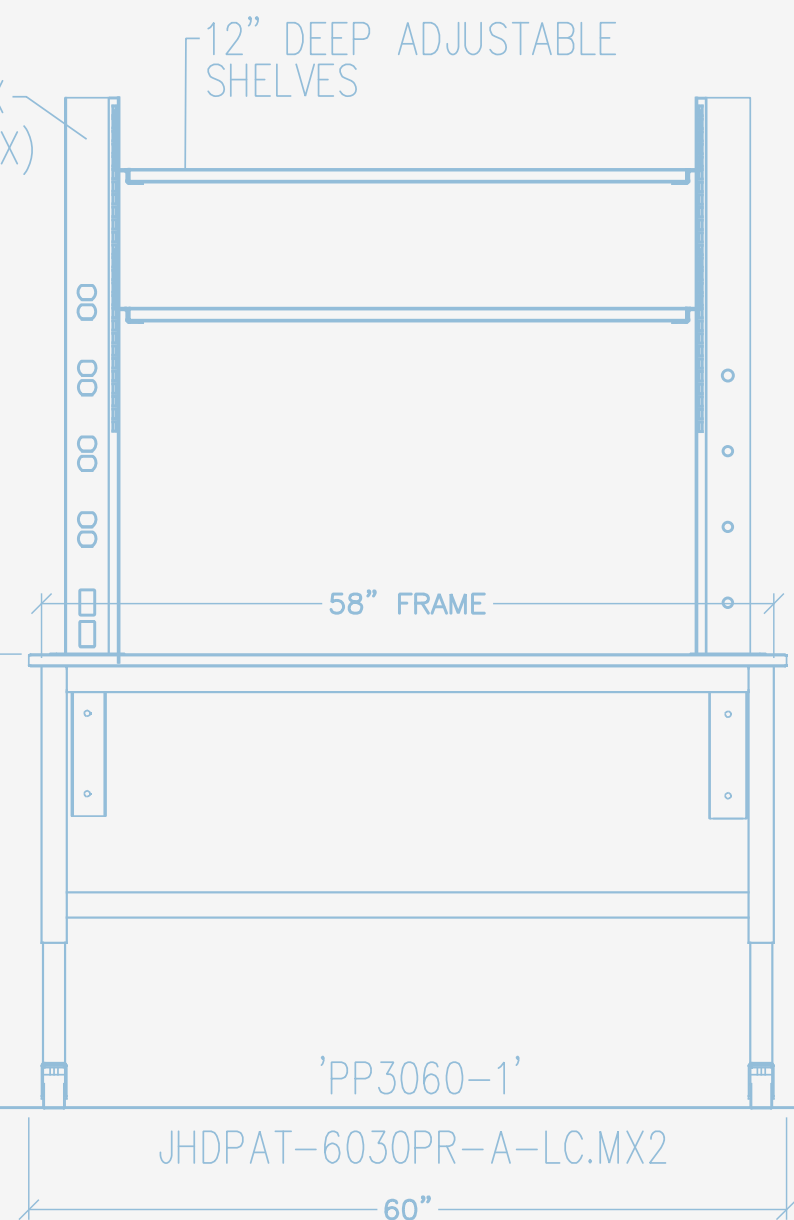

Service-Ready – Integral connections for power, data, and plumbing poles

Expandable – Suspends and docks storage cabinets to grow with your lab

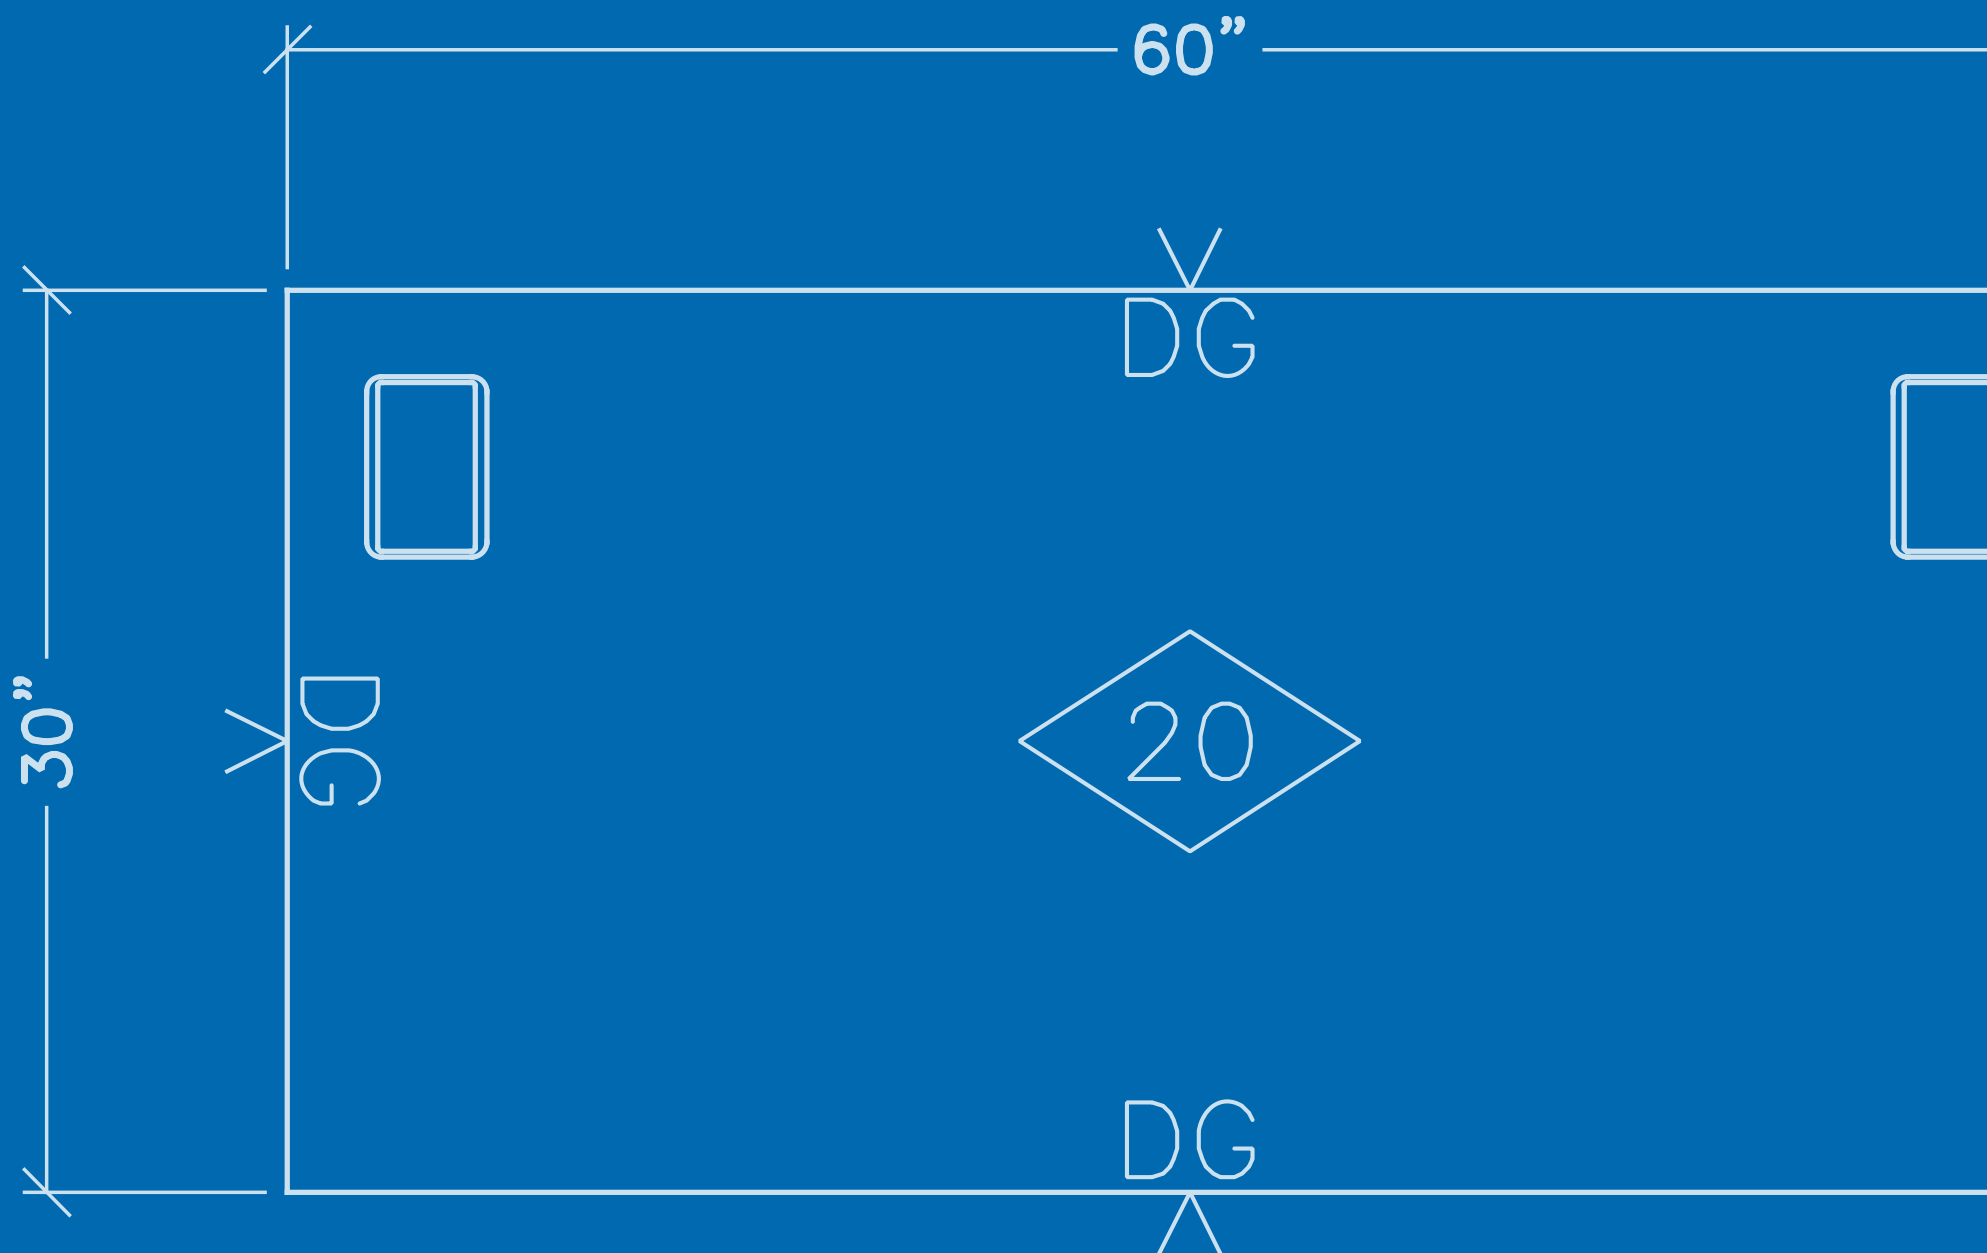

● DESIGNED TO LAST

As laboratory workflows evolve and research priorities shift, the spaces supporting that work must be equally prepared to change. Patriot Edge is more than a high-performance table system – it's a long-term investment built to grow alongside your lab. Developed in partnership with GSK and trusted across leading research facilities, Patriot Edge is engineered so that no component becomes obsolete before its time.

- **Plug-and-play service modules**
- **Adjustable lift systems that adapt**
- **Suspend or reconfigure storage easily**
- **Eliminates costly replacements & downtime**
- **Evolves with your research**

PLANNING YOUR PATRIOT EDGE LAB

From Adaptability to fixed solutions -
ICI Scientific is your single source.

● From Concept to Configuration

Every lab is different, and Patriot Edge is built to reflect that. Whether you're starting from a rough sketch or a fully documented floor plan, ICI's team works alongside you to populate your space with the right Patriot Edge configurations – tailored to your workflows, equipment, and storage needs. With free CAD and BIM files available and dealer support through installation, you'll have everything you need to make confident, informed decisions before a single piece of furniture ships.

Steel Casework

- **American-Made. Lab-Proven.**

Patriot Edge steel casework is manufactured in the United States and engineered to meet the demands of modern laboratory environments. Built on ICI's steel casework platform, every cabinet and enclosure is designed to integrate seamlessly with the Patriot Edge table system – suspending or docking directly to the frame to keep your workspace organized and your floor plan flexible.

- **Built to Perform**

ICI steel casework is fabricated with a minimum of 25% recycled steel content and finished with eco-friendly powder coat – durable enough to withstand the rigors of daily lab use and recyclable at the end of its life. ETL Listed and manufactured to SEFA standards, every piece is built to comply with the safety and performance requirements your facility demands.

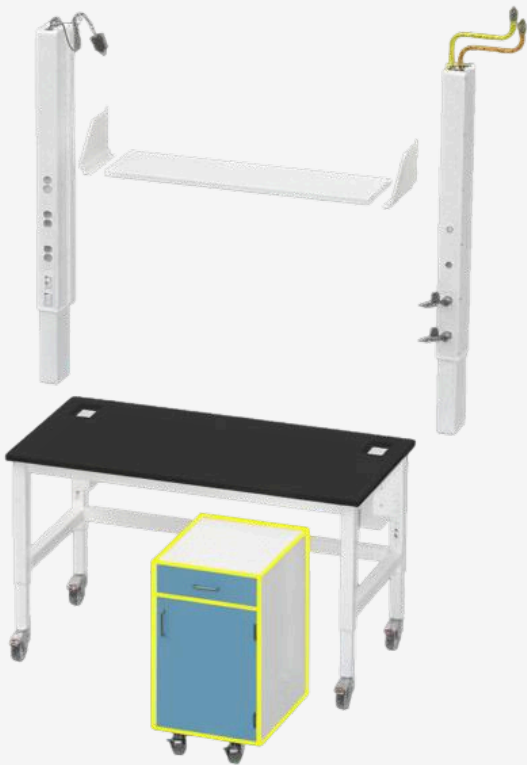

Cornerstone Casework is:

- American manufactured 
- Minimum 25% recycled steel content
- Eco-friendly powder coat finish
- Recyclable after its lifetime of use
- ETL Listed and SEFA compliant
- Fully integrated with the Patriot Edge table system

The Patriot Edge "Kit-of-Parts"

The Patriot Edge "Kit-of-Parts"

Each Patriot Edge component is engineered as part of a complete, plug-and-play system. Every piece is purpose-built for compatibility – designed to work together seamlessly today, and adapt to whatever your lab demands tomorrow.

Cabinets

Cornerstone base cabinets are available as suspended cabinets, mobile cabinets, mobile carts, and customized open cabinets (featuring open shelving). Base cabinets can include combinations of doors and drawers.

Frames

Patriot fully-welded frames are available in fixed height or adjustable through telescoping legs or an optional electric push button. Frames include heavy duty casters for mobility or optional leveling casters.

HIGHLIGHT TABLE FRAME

The Patriot Edge "Kit-of-Parts"

Shelving

Designed to span between slotted utility poles for structure, Patriot shelving is height adjustable and completely removable. Shelving is epoxy urethane powder-coated

Utility Modules

Patriot utility poles are designed to include either plumbing services, power services, data services or they can be blank. Blank poles can be provided with capped holes for future electrical, data or plumbing fittings.

Patriot Edge Specialty Features

Patriot Edge enhances user comfort and optimizes lab bench workflows through height-adjustable worksurfaces, specialty work surfaces, reagent racks, and integrated service poles.

- **Effortless Adjustability**

As laboratories evolve, prioritizing ergonomics is essential to support user comfort and productivity. Patriot Edge height-adjustable benches optimize workflow efficiency through crank or electric hydraulic lift systems – no contractor intervention required. Seamless tabletop height adjustments save time and simplify setup.

- **Specialty Work Surfaces**

ICI fabricates phenolic, plastic laminate, and HDPE work surfaces built for the demands of any lab environment. Phenolic tops are extremely strong, impact and rust resistant, and virtually maintenance free – available in a broad range of colors and resistant to acids, solvents, and moisture. Plastic laminate and HDPE options are ideal for hospital pharmacies, nurse stations, and facility libraries, while HDPE's monolithic marine plastic construction makes it the go-to choice for damp or wet environments.

- **Reagent Rack & Shelving**

A key challenge in any lab is balancing easy access to frequently used items with the need to avoid benchtop clutter. Patriot Edge supports above-surface shelving and customizable reagent rack solutions that elevate essentials within comfortable reach – protecting from spills while improving ergonomics and overall efficiency.

- **Integrated Service Poles**

Laboratories need reliable, organized access to power, data, and plumbing as equipment demands change. Patriot Edge supports UL Listed power and data poles as well as plumbing service poles, delivering immediate access to utilities along the bench and enabling users to adapt quickly to evolving workflows

Patriot Edge is sustainably designed with durability, flexibility, and mobility in mind.

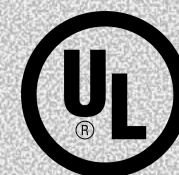

- **Built Green. Built to Last.**

Built on ICI's steel casework platform, Patriot Edge incorporates recycled steel content and eco-friendly powder coat finishes – contributing toward LEED certification goals. Designed for long-term use, every component is purpose-built to adapt alongside your lab, reducing the need for full replacements and keeping materials out of the waste stream.

INSTITUTIONAL CASEWORK INCORPORATED is committed to manufacturing inventive, sustainable designs to Tier One Laboratory market specifications. ICI's Metal, Wood & Specialty Products Divisions build laboratories & teaching environments to meet your need for flexibility, function, innovation and design.

ICI's Flex Family:

FlexCore® - Plug & Play Flexible Layouts with Fixed Modules

Patriot & Patriot Edge® - Plug & Play Flexible Layouts with Mobile Modules

ENVISION® - Function Driven Work Benches

Overhead Carrier Services Premier Wood - Tier One Wood Laboratory Casework & Furniture

ICI Fume Hoods:

Isolator3® - Tier One High Performance Hoods

Isolator Gen5® - Bench & Walk-in Hoods

LabShield® - Educational Hoods

ICI's Laboratory Products:

ICI Cornerstone - Painted Steel Casework & Furniture

ICI Cornerstone - SS Casework & Furniture

CampbellRhea™ - Educational Casework & Furniture

Specialty Products - Phenolic, Plastic Laminate & HDPE Fabrication

INSTOCK® - Quick Delivery Laboratory Furniture & Fume Hoods
